Kiss Mihály

Computer Science student

Summary

Student at University of Szeged.

I am studying Computer Science with a specialisation in Artificial Intelligence.

Finished courses like: Machine learning in practice, Artificial intelligence-based text analysis

Studying these courses this semester: Computational semantics, Data analysis in social media

Experience

Own projects

I have created 2 small projects of my own that make decisions using different learning algorithms. They are uploaded on my website.

University projects

There were some school projects, for example: bank web application, job search web application, Heroes Of Might and Magic game simplified. All written in Java. In addition, I am currently working on two submissions related to data processing and computational semantics.

Education

University Of Szeged
Sep 2021 to Jun 2024

Computer Science

Kecskeméti SZC Kandó Kálmán Technikum
Sep 2015 to Jun 2020 (technical college)

High School Diploma

Graduate

Skills

Python, SQL (MySQL, PostgreSQL, Oracle), Java. I also studied C, C++, HTML, CSS, JavaScript.

Finished Introduction to Data Science course, which is provided by Cisco
